Re: Support for the K Line Northern Extension, San Vicente-Fairfax Alignment

Dear Metro Board of Directors,

I am writing in support of the San Vicente-Fairfax alignment for the Metro K Line Northern Extension. Once completed, this route will bring fast, reliable, and affordable transit from the South Bay, Los Angeles International Airport (LAX), South LA, Inglewood, and the Crenshaw corridor to Mid-City, West Hollywood, and Hollywood. This alignment will rank among the highest ridership light-rail lines in the country with almost 100,000 daily riders, and it would serve 325,000 residents, 250,000 workers, 770 regional destinations, and 80,000 low-to-no-car households. It will ease congestion and free up parking in our communities.

The San Vicente-Fairfax alignment will expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, Television City, the Beverly Center, West Hollywood's Rainbow District and Pacific Design Center, the Hollywood Bowl, and many underserved communities. This project will also provide a direct connection to Cedars-Sinai Medical Center, one of the nation's premier healthcare providers.

I encourage the Metro Board of Directors to support the San Vicente-Fairfax alignment as the best option for our communities. Let's make sure the K Line connects more people to more places.

Sincerely,

Laura Friedman
Member of Congress
